Summary

Software Engineer with expertise in web development, specializing in React.js, Next.js, and scalable backend systems using Spring Boot and Node.js. Skilled in designing high-performance APIs, database management with MongoDB and SQL, and optimizing system performance. Passionate about problem-solving and building user-centric applications in fast-paced environments.

Experience

Unified Mentor

Sep 2024 - Oct 2024

Full Stack Developer Intern

Bengaluru, Karnataka

- Developed and enhanced a full-stack website using ReactJs and Express.js, improving functionality and user experience, which led to increased user engagement
- Collaborated with team members to optimize website performance using Firebase, ensuring speed and scalability across different platforms and devices, resulting in faster load times
- Utilized server-side technology Firebase to implement core back-end logic, ensuring seamless integration with the front-end and database, which improved data processing efficiency

Projects

Tripaza - AI Trip Planner (tripaza.in)

- AI-driven trip planner that generates full-day itineraries based on user inputs.
- Deployed and scaled the platform to support real-time users with optimized database queries.
- Integrated MongoDB for efficient storage and retrieval of trip data.

MockTrade - Trading Simulation App (github.com/05shourya/MockTrade)

- Real-time stock trading simulator with order execution and performance tracking.
- Implemented MongoDB for transaction history storage and quick data retrieval.
- Built a user-friendly dashboard for seamless trade execution and portfolio monitoring.

ChatSphere - Real-time Chat App (github.com/05shourya/Chat-Sphere)

- Live messaging platform with Firebase authentication for secure communication.
- Integrated real-time database updates for instant message delivery.
- Designed a responsive UI for an intuitive chat experience.

Worthy - Transaction Tracker (github.com/05shourya/Worthy)

- Personal finance tracker for logging and categorizing expenses.
- Utilized Hive for local storage, ensuring offline access and fast performance.
- Implemented visual spending analytics for better financial insights.

Skills

- HTML, CSS, Javascript, Python, Java, ReactJs, Next.js, Node.js, Express.js, Spring boot, MongoDB, SQL, Firebase, Flutter, Git, GitHub, Docker

Education

Alliance University

Sep 2021 - Jun 2025

Computer Science & Engineering

Bengaluru

Certifications

- Use Docker at AWS with the Command Line (Coursera)
- Fundamentals of Java Programming (Board Infinity)
